

LIMITLESS CONNECTIVITY

Secure, stable & simple
to install and expand

✓ RMX Hub 4G

Wirelessly collect data from multiple devices, sending it to the RMX Cloud via its dedicated cellular connection.

✓ RMX Transmitter

Wireless transmitter for communicating equipment or device information to the RMX Box.

✓ RMX Gateway 4G

For connecting remote or mobile equipment to the RMX Cloud cellularly.

✓ RMX I/O

For connecting to equipment or devices without digital controller or for custom instrumentation.

✓ RMX Accessories

Full catalog of approved and tested accessories to make customization and installation on any equipment.

SOLUTIONS THAT WORK

Engineering Expertise,
Real-World Experience

ProCura IoT

Here are a few of the many reasons why
ProCura-IoT is right for your business:

1

Your Data

You choose who has access to your data and how they can use it.

2

Security

Separate cellular connection means hackers can't use RMX to control or access company intranet.

3

Online Portal

Where there's web, there's ProCura IoT. Live statuses are a click away - (customize access per user).

4

System Configuration

Not just asset monitoring. Combine assets to create systems without limits per site or company.

5

Email + Text Notifications

Alerts Utility allows you to setup and configure notification preferences for each individual user.

6

Compatibility

Immediately connect to any equipment controller type or custom instrumentation from any manufacturer.

7

Expandable

Expand to an unlimited amount of assets at any time. As your IoT needs grow, so does your ProCura IoT.

8

Data Analytics

Graph, export, and analyze any data point.

9

Reporting

Build reports that are easily viewable and can be sent by email per your chosen schedule.

10

Onsite Data Storage

The integrated memory means that you'll never lose data regardless of cellular signal.

ASSET MANAGEMENT — MADE EASY

INDUSTRIAL IoT SOLUTION

ProCura IoT

RMX 2.0 Platform

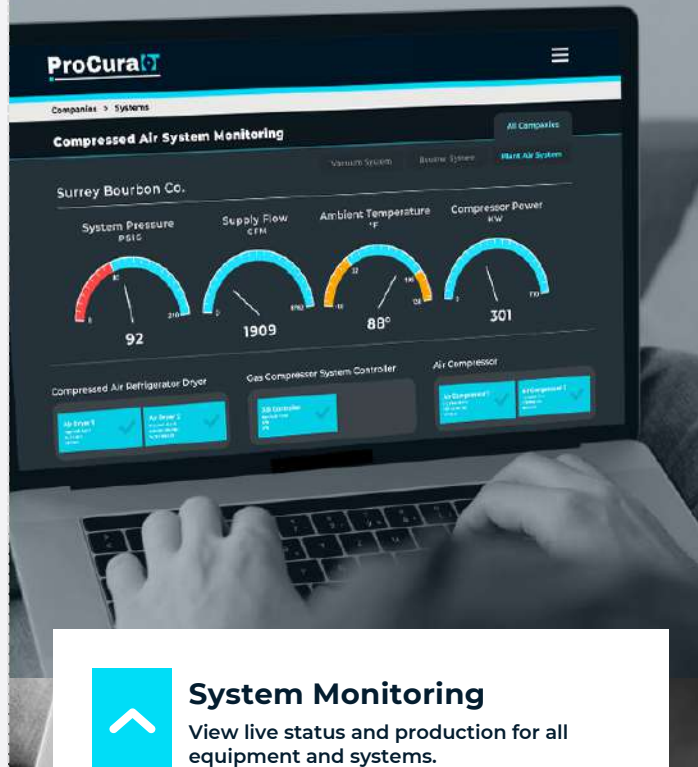

CONNECT ANY ASSET

ProCura IoT's customizable, cloud-based system is the market leading solution for providing a complete and accurate view into industrial equipment and system performance.

Off-The-Shelf Tools That Provide Infinite Potential

Easily monitor and analyze any equipment in real time. Our hardware enabled platform and accessories allow for wireless connection to any asset or sensor — accessed securely from any online device, anytime.

System Monitoring

View live status and production for all equipment and systems.

Companies Dashboard

View current status of all monitored companies.

Analytics & Reporting

Graph, export or generate custom reports for any data point.

Asset Details

Access real-time readings for all monitored equipment.

CONTINUOUS VISIBILITY

Efficiently delivered with simple to navigate, multi-level dashboards.

REAL-TIME NOTIFICATIONS

Email and text alerts keep you informed of the status of all your equipment from anywhere, anytime.
